# GAMEBUILDING Afterschool Club

2D & 3D Games!

At Jam Coding, our goal is to help improve children's digital skills. This **game building** workshop will teach children how to code and build their very own 3D computer game. Children will have fun creating interactive animations and games using visual coding. Working in teams, they will learn how to think logically and solve problems. At the end of the course, all children will receive a certificate and one team will receive a trophy!
