

# Digimaps

The map window is the largest area in Digimap for Schools, where you:

- View maps
- Select different maps
- Zoom in and out
- Pan around

## Zoom to your location

On opening Digimap for Schools, your map window will be centred on Great Britain.

### To zoom in on a location:

- Double click on the map window
- Double tap on the map window
- Select the plus sign on the scale bar
- Select any point on the scale bar to zoom to that scale
- Select the drag zoom tool (above the scale bar), then drag a box on the map window to zoom to that area
- Move the mouse scroll wheel towards the screen, i.e. away from you

### To zoom out:

- Select the minus sign on the scale bar
- Select any point on the scale bar to zoom to that scale
- Move the mouse scroll wheel away from the screen, i.e. towards you

## Select a different map

The Map selector button will be green when map selection is possible.

- To see what maps are available, select the Map Selector button to open the menu.
- To switch to a different map, select the button to the right of the map name.
- For example in the image below, Aerial mapping will be displayed as the button to the right is selected.
- Your selected map will be generated in the map window.
